

PCB Hammer Crusher

The Hammer Crusher is used to crushing ordinary fragile ores of the compressive strength no more than 200Mpa, such as limestone, gypsum, coal, marl, sandshale etc. These series product has features of high crushing ratio, even product graininess, simple construction, reliable operation, easily maintenance, economical running cost etc., so are widely used in cement industry.

Feature Of PCB Hammer Crusher:

Type	feed size (mm)	Capacity (t/h)	Main shaftSpeed (r/min)	Power (kw)	Weight (t)
F350*180	50	0.7-3	800	Y5.5-4	0.4
F450*240	80	5-7	800	Y13-4	0.6
F520*310	100	7-10	800	Y15-4	0.8
F600*400	150	10-15	800	Y30-4	1.3
F800*600	200	18-24	980	Y55-4	2.6
