

Vertical Shaft Impact Crusher

This series absorbed the principle and technology of Barmac Company of America, on behalf of the international level. It is widely used for moderate crushing and fine crushing of all kinds of hard and fragile material in rock, refractory, cement, quartzite, iron ore, etc, especially, for building stand and making road stand.

Feature Of Vertical Shaft Impact Crusher:

Models	Impeller Speed (mm)	Max. Feed Lump (mm)	Capacity (t/h)	Power (kw)	Weight (t)	Overall dimension (mm)
PCL-600	2000-2470	30	20-35	45-75	5.6	2800*1500*2030
PCL-750	1500-2045	35	35-55	75-110	7.3	3300*1800*2400
PCL-900	1200-1685	40	55-100	110-180	12.1	3750*2120*2660
PCL-1050	1000-1430	45	90-160	180-264	16.9	4480*2450*2906
PCL-1250	850-1300	45	160-230	264-370	22	4563*2650*3716
PCL-1350	800-1185	50	200-260	320-440	26	5340*2940*3650
