

Concrete Block Machine

The machine can process all kinds of new type materials in industrial scrap: sand, stone, fly ash, coal refuse, cinder, slag, ore slag and pearl rock etc, for example hollow building block, blind hole bricks and standardize bricks etc.

Special features :

- 1.reasonable designing, compact structure, directional vibration, brake with adjustable frequency, low energy consumption, no need to lie carrier by manpower, greatly reduce the labor intensity.
- 2.press from up and down, strong ramming strength, suitable to produce highstrength block, and the products can be directly piled up to 35 layers after shaping.
- 3.it can produce various types of blocks with different moulds.

QT615 Fully Automatic Block Making Machine:

Block Spec (mm)	Shaping Quantity (pieces)	Shaping Time (second)	Capacity (/8h)
390*190*190	6	15-20	8640-11500
240*115*90	15	15-20	21600-28800
240*115*53	30	15-20	43200-57600

QMJ445B Immovable Block Making Machine:

Block Spec (mm)	Shaping Quantity (pieces)	Shaping Time (second)	Capacity (/8h)
390*190*190	4	20	5760
390*240*190	3	20	4320
390*90*190	8	20	11520
240*115*90	9	20	12960
240*115*53	21	20	30240
